**PATENT APPLICATION**

**IN THE UNITED STATES PATENT AND TRADEMARK OFFICE**

In re application of

Docket No: Q64826

Tsuyoshi KITAHARA

Allowed: May 6, 2004

Appln. No.: 09/878,325 ✓

Group Art Unit: 2853

Confirmation No.: 2121

Examiner: Ly T Tran

Filed: June 12, 2001

For: **PIEZOELECTRIC VIBRATOR UNIT**

**COMMENTS ON EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE**

Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

Sir:

Applicant believes that the Examiner has misstated the teachings of claims 19-26. Specifically, contrary to the Examiner's Statement of Reasons for Allowance, claims 19-26 do not recite "a magnitude of electric fields applied between the common and segment internal electrode layers to the piezoelectric layers is non-uniform to cancel a bending moment caused during contraction of the piezoelectric vibrator." Also claim 10 does not recite "piezoelectric layers are non-uniform in thickness." Accordingly, these claims should not be interpreted to include these limitations.

Respectfully submitted,

Cameron W. Beddard
